DETAILED ACTION

This action is in response to application filed on February 12, 2002 in which claims 1-8 are presented for examination. The address change submitted 2/27/04 has been noted.

Priority

Claims Priority from Provisional Application 60/268,140 filed on February 12, 2001.

Claim Objections

Claims 1-8 are objected to because of the following informalities: Regarding claims 1-3, 6 and 7 in the preamble, the character ";" must be replaced with ":". Claims 4, 5, and 8 depend from the objected claims 3 and 7, and therefore are also objected on the same merits.

Appropriate correction is required.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Matsumoto et al (U.S. Patent No. 6,763,334).

Regarding claims 1 and 7, Matsumoto discloses a system and method for determining which ads direct which web clicks comprising (abstract):

a database comprising information about a user's media buys (fig. 1, item 15, col. 7, lines 15-56).

an index log file optionally comprising a user's IP address (fig. 2, item 62, col. 8, lines 53-64);

said system comparing information from said first database with information from said index log file to determine which of said ads generated said web clicks (col. 10, lines 8-12).

Matsumoto does not expressly teach a second database for storing user's IP address, but does store user's referrer log showing all referring pages from which the user is led to entrance page and also optionally stores the user's IP address in the index log file (62). Note, the user's IP address does not have to be stored because Matsumoto system uses an index URL embedded in the ad which allows for the monitoring of the user's access induced by the advertisement hence the actions of the user are known without the need for user's IP address, however, optionally user's IP address may be stored (col. 8, lines 53-63).

It would have been obvious to a person of ordinary skill in the art at the time the invention was made to store user's IP address and referrer log in a second database in the Matsumoto system by simply modifying the index log file (62) to be implemented as a database. One would be motivated to use a second database instead of an index log file to easier manipulate the data stored in the index log file.

Art Unit: 2171

Regarding claims 2 and 8, Matsumoto discloses the system further comprises a report which shows which ads generated the web clicks (col. 9, lines 61-65).

Regarding claim 3, Matsumoto discloses information about the user's buys comprises; date and time of advertising, type of advertising, location of ad and expiration date of the ad (col. 7, lines 24-40).

Regarding claim 4, Matsumoto discloses the information about a user's media buys further comprises cost of the ad (col. 5, lines 22-29).

Regarding claim 5, Matsumoto discloses the information about a user's media buys further comprises demographics of the ad (col. 6, lines 59-63).

Regarding claim 6, Matsumoto discloses a report which shows which of the web clicks do not correspond to an ad (col. 9, line 61 to col. 10, line 7).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marc R Filipczyk whose telephone number is 703-305-7156. The examiner can normally be reached on Mon-Fri, 8am-4:30pm.

Application/Control Number: 10/074,401
